TO THE PARENTS
PRIMARY SCHOOL OF LENO
CLASS

We inform the parents of the pupils in the school that due to the happening of some cases of LOUSE INFECTION , the following precautions must be attended by everyone:

- 1- Check if your child has caught the infection (finding insects or eggs in the hair and itch with consequent scratching).
- 2- Buy in a chemist's shop the anti-lice shampoo against head parasites.
- 3- Give a careful hair wash as described in the directions booklet of the product
- 4- Carefully check the results. Look for parasites and eggs keeping in mind that TEMPLES and NAPE are louse's favourite places to hide. Eventually repeat the operation after a week.
- 5- Comb hair with a thick comb to detach eggs and eventually use some vinegar poultices.
- 6- You don't need to keep your children at home ,just inform the teacher of the eventual presence of parasites without getting too worried. Thanks for collaboration.

The headmaster
